

## GREENBROOK LAUNCHES 2011 CATALOGUE

GreenBrook has unveiled the company's latest selection of innovative new products with the launch of its 258-page 2011 Catalogue.

Designed to provide a complete buyer's guide to the entire GreenBrook range, the new catalogue sees the launch of several new product ranges across its RCD, lighting, wiring accessories and cable management portfolios. The Catalogue's updated layout has been designed to help customers identify the GreenBrook products they need quickly and easily whatever their requirements.

Amongst the key new products for the 2011 catalogue is the company's new PowerBreaker SRCD range which has been developed to offer practical and aesthetic design features and provides faster trip speeds than ever before. The range is the first on the UK market to be fully certified to the latest standards, including EMC compliance.

Also new for 2011 is GreenBrook's energy-efficient range of emergency lighting along with the company's first ever LED striplights, which provide an innovative solution for feature and display lighting applications as they are stylish, energy efficient and designed to link together for maximum flexibility. Other new products in this year's catalogue include a new range of smoke, heat and CO<sup>2</sup> alarms, a new IP66 weatherproof range of wiring accessories and a new conduit pipe bender.

The new catalogue is available from GreenBrook by emailing [marketing@greenbrook.co.uk](mailto:marketing@greenbrook.co.uk) or tel: 01279 772 760 or it can be downloaded from [www.greenbrook.co.uk](http://www.greenbrook.co.uk)
