

NEW

PowerBreaker® WN Range of weatherproof products

.....housed in a new stylishly designed weatherproof enclosure

- Clear lid to show status of the RCD
- Padlockable lid for security
- Weatherproof to IP55
- Fixing holes are external to the wiring compartment for maximum IP integrity
- Lid removes for ease of installation
- Three bottom and two rear 20mm knockouts
- Large wiring compartment
- Tough polycarbonate construction
- Front removal of product for easy wiring

WN93MN-C RCD Spur Unit

- Visible power-on indicator
- Rated at 13A 3kW (3A Inductive)
- Typically 30mA trip current - to minimise electrocution and fire risk
- Mechanically latched - making it particularly suitable for pond pumps and other pond equipment
- Suitable for all outdoor power connections from CCTV cameras to hot tubs
- Complies with BS 7288, BS EN 61543, BS EN 60529, BS1363, BS 5733 (as appropriate)
- Faster than 40mS trip speed

Most people derive the RCD protection for their pond equipment from the use of an RCD plug or adaptor. While these are perfectly suitable for protecting people from the risk of electrocution, there is still a potential risk when it comes to the fish. Because RCD plugs and adaptors are electrically latched, they trip in the event of a power failure to the house, and need resetting when the power is restored. This can be a problem if the occupants are away for an extended period, during which time the RCD trips. Make sure your customers have the correct product installed, so they don't return from holiday to find that their prize koi have turned blue in the face through lack of aeration.

Additionally you can't use a timer with a RCD plug or adaptor - you can with a PowerBreaker RCD Spur Unit

WN22MP-C Twin RCD 13A Socket

- Weatherproof even with plugs inserted
- Rated at 13A 3kW (3A Inductive) 230V AC
- Faster than 40mS trip speed
- Typically 30mA trip current - to minimise electrocution and fire risk
- Complies with BS 7288, BS EN 61543, BS EN 60529, BS1363 (as appropriate)
- Suitable for lawn mowers, hedge trimmers, DIY power tools, electric patio heaters, outdoor Christmas and party lighting.

NEW

Also new in the PowerBreaker range is the H92WN-C RCD Fused Spur Unit - this has the added feature of -

- Neon Indicator
- Polycarbonate Front Plate
