

WEEE COMPLIANCE

B2B COMPLIANCE

EEE Prod Reg Number - WEE/MM1521AA

GreenBrook places various types of Electrical and Electronic Equipment (EEE) on the market in the UK. Electrical and Electronic Equipment is subject to waste regulation under the Waste Electrical and Electronic Equipment Regulations 2006 (as amended) and should be disposed of responsibly and prioritised for re-use and/or recycling when it becomes waste (WEEE).

Purchasers may dispose of their WEEE free of charge locally at Designated Collection Facilities (DCFs). Details of your local DCF can be found at: www.recyclenow.com.

GreenBrook is obliged to take back, free of charge WEEE from a Purchaser, as long as we are notified within 28 days from purchase that you would like us to recycle your old unit and on a like-for-like basis for treatment and recycling.

GreenBrook is required to do this in any calendar year in which new EEE has been purchased by the Purchaser. In certain circumstances, this may include WEEE not originally supplied by the Company.

If any Purchaser requires GreenBrook to take back any WEEE, they should write to the Technical & Quality Manager, GreenBrook Electrical, 62 West Road, Harlow, CM20 2BG who will then advise on the necessary arrangements for the receipt, proper treatment, and recycling of the WEEE.

BATTERY COMPLIANCE

VALPAK - RM08608

Our BCS is Ecosurety batteries, Registration number BPRN - 04974 NPW302040

Greenbrook is classified as a battery producer of portable batteries. We place more than 1 tonne of portable batteries on the market and therefore are members of a Battery Compliance Scheme (BCS).

PACKAGING COMPLIANCE

GreenBrook meets its packaging compliance requirements by being a member of the Valpak RM08608 Packaging Compliance Scheme.
